

Service Disabled Veteran Owned Small Business

Introduction to Coalfire Government Systems - Professional Security Services

CGS specializes in meeting the unique information security needs and budget constraints of the government and commercial sectors. Within our realm of expertise, CGS provides professional security services that bring real value to our partners. We employ rigorous quality assurance to ensure that all project tasks are completed to the highest standards and meet the client's requirements.

Professional Services Advantage of CGS

With a winning combination of qualifications and experience backed by deep skills in IT Security, IT Audit and Compliance, as well as IT Forensics, CGS is a capable and responsive partner. Our emergency planning consulting practice has guided many communities in the implementation of a risk management capability that meets best practices and regulatory requirements. As more government contracts specify the inclusion of Service Disabled Veteran Owned Small Business Concerns (SDVO SBC), contractors are seeking organizations that both meet the legal requirements of a SDVOSB and have the requisite skills to provide value added services.

CGS Government Experience

CGS has successfully completed more than a hundred public sector engagements as a prime and sub-contractor for federal, state and county government organizations, airports and healthcare organizations. With the rapidly escalating demand for cyber security safeguards within federal and state programs, CGS has developed a proven engagement model for IT security, audit & compliance and forensics. With delivery capability in Colorado, Washington, New York and California, CGS has the ability to support public sector projects throughout the United States.
